

In November 2011, a show called *Ugriznimo znanost* (Bite the Science) has been shot at the [Faculty of Computer and Information Science](http://www.fri.uni-lj.si/en/) by the national public broadcasting organization (RTVSLO).

Bite the Science is a weekly series on the educational channel TV Slovenia. It is the series which aims to explain the science in a relaxed and humorous manner. The topics range from current events in science to accomplishments of Slovene scientists and scientific research in other parts of the world.

The episode scheduled for the last week of December has discussed programming. In it I am presenting my achievements at [the Google Summer of Code program](http://code.google.com/soc/) ([Nimfa library](http://nimfa.biolab.si)) and discuss [Orange](http://orange.biolab.si), open-source data mining and visualization tool developed by [Biolab, Bioinformatics Laboratory](http://www.biolab.si/en/). Further, researchers talk in the episode about smart house, Faculty Robot League, summer school of programming and mathematical data analysis used for predicting the results of the Eurosong competition.

Take a look (link to the episode is below)!

A photograph showing a person in a dark setting, possibly a laboratory or office, with a computer monitor and other equipment visible. The image is somewhat blurry and has a low resolution.
