---

`<p style="text-align: justify;">This year I am participating at <a href="http://mlss.tuebingen.mpg.de/index.html" target="_blank">Machine Learning Summer School</a> (MLSS) that is held in Tübingen, Germany. The Summer School offers an opportunity to learn about fundamental and advanced aspects of machine learning, data analysis and inference, from <a href="http://mlss.tuebingen.mpg.de/speakers.html" target="_blank">leaders of the field</a>. Topics are diverse and include graphical models, multilayer networks, cognitive and kernel learning, network modeling and information propagation, distributed M, structured-output prediction, reinforcement learning, sparse models, learning theory, causality and much more. I am looking forward to it. Also, posters are a long-standing tradition at the MLSS. Below is an image of a poster presentation that covers some of my recent work.</p>`
