---

[BioTechniques](http://www.biotechniques.com), The International Journal of Life Science Methods highlighted our recent paper on *Discovering disease-disease associations by fusing systems-level molecular data*, which was published by Nature's Scientific Reports. [In the paper](http://www.nature.com/srep/2013/131115/srep03202/full/srep03202.html) we applied our novel computational approach for data fusion to a plethora of molecular data in order to discover disease-disease associations.

Complete article featuring our study and a commentary by paper's senior author [prof. Blaz Zupan](http://www.biolab.si/en/blaz/), PhD are available at [BioTechniques site](http://www.biotechniques.com/news/Finding-Connections-Between-Genes-and-Diseases/biotechniques-348720.html#.UqvpKqWc-Qa).
